SUMMARY

Full-Stack Developer with 1+ year of experience building production web applications using React.js, Node.js, Express.js, MongoDB, and TypeScript. Skilled in developing end-to-end frontend and backend systems, REST APIs, and database architectures, with experience in authentication, payment integration, and real-time features. Contributed to product development and technical problem-solving on a live talent marketplace platform.

SKILLS

Languages: JavaScript, TypeScript, Python, HTML5, CSS3

Frontend: React.js, Redux, Tailwind CSS, Responsive Web Design

Backend: Node.js, Express.js, REST API Development

Databases: MongoDB, Mongoose, MySQL

Authentication & Security: JWT, OAuth, Session Management

Tools & Platforms: Git, GitHub, Postman, Docker, VS Code

Other: Payment Gateway Integration (Razorpay/Stripe), WebSockets, Socket.io, WebRTC, Third-Party API Integration

EXPERIENCE

Full-Stack Developer (Contract)

Jul 2025 – Present

DU Assassins – InternFree

Remote

- Took full ownership of InternFree's backend, building it entirely from scratch (50+ REST API endpoints across core modules) after the previous frontend intern's departure, later requesting and onboarding 1 additional frontend intern and mentoring their ramp-up
- Designed a 3-tier role-based access control system (Super Admin, Moderator, Interviewer) powering a 3-stage talent verification pipeline (screening, technical, behavioral) that qualifies talent for a platform-verified badge
- Engineered a weighted matching engine (80/20 scoring model) combining hiring-intent match with interview-based profile completeness, automating talent recommendations that previously required manual shortlisting
- Implemented real-time voice and video calling using Socket.io and WebRTC across all 3 interview stages, enabling live interviews and workspace collaboration directly within the platform
- Built an escrow-based payment system with Razorpay spanning 3 fund-flow stages (hold, release, payout), alongside 4 workspace collaboration tools (chat, file sharing, approval flow, revisions) and an admin-mediated dispute resolution module

Software Development Intern

Jan 2025 – Jun 2025

DU Assassins – InternFree

Remote

- Built core frontend features for InternFree using React.js and Tailwind CSS over a 6-month internship, integrating REST APIs developed by a fellow intern to ship the platform's first production release
- Partnered with 1 co-intern in a 2-person founding team to divide ownership across frontend and backend, collaboratively designing wireframes and user flows to translate the founder's product idea into a functional platform

PROJECTS

Real-Time Chat & Video Call App | *React.js, Node.js, Socket.io, WebRTC*

- Built a real-time messaging application with one-to-one and group chat using Socket.io for bidirectional communication
- Implemented voice and video calling using WebRTC, including peer connection handling and a signaling server; secured sessions with JWT-based authentication

E-Commerce Platform with Payment Integration | *MERN Stack, Razorpay*

- Developed a full-stack e-commerce application with product catalog, cart, and order management
- Integrated Razorpay payment gateway with order verification and webhook handling; built role-based dashboards for admin and customers on a normalized MongoDB schema

EDUCATION

B.Sc. (Hons.) Electronics

Sri Venkateswara College, University of Delhi

Graduated: 2026

CGPA: 6.3/10
